

As the first library in China with dual functions of public library and academic library, University Town Library of Shenzhen is open to local residents while shared by Peking University Shenzhen Graduate School, Tsinghua Shenzhen International Graduate School and Harbin Institute of Technology, Shenzhen. As a professional, research-oriented, digital, fully open modern library, its mission "All for the people, for all the people" aims to serve the local students and faculty members, corporate researchers and ordinary Shenzhen residents. As the construction unit of science and technology documentation center (one of four plates of International Science and Technology Information Center), the library is the important scientific and technological document resource support base, the science and technology literature and information service center, the science education base and social public information exchange service platform for the market, industry, research and development in Shenzhen. With more than 2.3 million copies of printed documents, the library is the most abundant electronic resources in Shenzhen.

3 Features

As the library with the most abundant electronic resources in Shenzhen, our collection development policy places equal importance to print resources as well as electronic collections. It highlights the collection of foreign language, technological and electronic resources. It initially builds up a resource system with a complete range of categories and disciplines, with focus on electronic information, chemical biology, material science, logistics engineering & management, and urban & environmental advanced manufacturing.

● Print Resources

Type	Quantity
Chinese Books	2.11 million
Foreign Books	1.9 million
Chinese Journals & Newspapers	245
Foreign Journals & Newspapers	54
Hong Kong & Taiwan Journals & Newspapers	43

● Digital Resources

Type	Quantity
Database	385
Chinese E-Books	1.93 million
Foreign E-Books	0.54 million
Chinese Full-Text Digital Periodicals	17000
Foreign Full-Text Digital Periodicals	56000

4 Academic Resource Map

Based on the clustering of 113 first-level disciplines under the 14 disciplines of the Ministry of Education, Academic Resource Map is to realize the aggregation and navigation of multi-type academic resources, and to realize the correlation with the full-text resources ordered by our library, easy to obtain the full text, and to facilitate the discovery of important academic resources in specific disciplines.
